- Developed executive KPI dashboards using Power BI for financial reporting
- Created interactive drill-through dashboards and DAX-based measures
- Automated reporting workflows using Power BI Service
- Implemented row-level security and scheduled refresh pipelines
- Acted as single point of contact for production issues, ensuring minimal downtime

- Performed data validation, system testing, and supported UAT cycles
- Delivered training and post-go-live support to business users

Senior BI Consultant, MSIG Singapore via U3 Infotech, Singapore

Aug 2016 – Oct 2020

- Drove migration from legacy systems to SAP Insurance platform using SAP HANA, BW, and SAP BO tools.
- Developed dashboards and reports in SAP Business Objects and Tableau; enabled self-service BI by using Analysis Edition for OLAP and SAP Lumira.
- Design and implement ETL stored procedures, uploading data from BW source to SQL Staging DB, then perform transformation and upload to the final table in DataMart.
- Managed business requirements, technical documentation, and user acceptance testing.
- Led ETL process design, performance tuning, and automation of reporting suites.
- Automated reporting workflows and scheduling using enterprise tools

Analytics Consultant, Maersk Group Analytics, Pune, India

Aug 2015 – Feb 2016

- Delivered global scorecards, dashboards, and BI solutions to support data-driven decisions.
- Facilitated BI tool training and adoption; managed BI application support and enhancements.
- Define standard processes, RACI, IT & business relationships & reporting

Business Analyst/BI Lead, ALMOD Diamonds, New York City

Aug 2012 – Mar 2014

- Led transformation of reporting from legacy reporting to SAP Business Objects.
- Designed secure, user-friendly dashboards and reports; managed server environments and migrations.
- Improved reporting performance using aggregation and indexing strategies
- Managed end-to-end BI lifecycle including development and production support

Senior BO Developer, Morgan Stanley via Capgemini, Pune, India

Jul 2010 – Jan 2012

- Developed and maintained BI universes and reports for investment banking applications.
- Optimized universes and reports for performance and scalability
- Supported multi-environment deployments (DEV, QA, UAT, PROD)
- Troubleshoot any issues or bugs discovered during a project and provide ongoing application support.
- Mentored junior consultants and managed report migrations across environments.

BO Developer at Cognizant Technology Solutions

Sep 2006 — May 2010

BO Developer at Cognizant Technology Solutions, focusing on report development, ETL testing using Workflow Monitor, Workflow Manager and UNIX, and system enhancements for banking and financial services clients like Washington Mutual Bank and Credit Suisse.
